

EcoSchools Framework

A Guide for Implementation & Certification

Just as wildlife needs specific elements to survive and thrive—food, water, shelter, and a place to raise young—your EcoSchool requires specific elements to implement and sustain the program and to certify as an EcoSchool in the United States.

FORM AN ACTION TEAM

Create a student-led committee with diverse abilities and perspectives to drive environmental-based education and actions for the school community.

IDENTIFY CURRICULUM CONNECTIONS

The team's nature and community-based actions will connect to what students are learning in classrooms.

AUTHENTICALLY ENGAGE THE COMMUNITY

Foster genuine connections and share transformative stories from working at the nexus of environment, community, and economy.

TAKE ACTION, COLLECT DATA, MEASURE IMPACT, AND SHARE STORIES

Explore community and nature-based solutions for the team's action plan, measure the school's impact, and share accessible, fact-based stories to raise awareness and promote collaboration.

CELEBRATE, REFLECT, AND CREATE AN ECOCODE

Celebrate successes big and small, reflect on how to improve for the future, and creatively display the school's commitment to nature-based solutions in an EcoCode.

DEVELOP AN ACTION PLAN

Annually create an action plan that aligns with the committee's values, focusing on nature-based solutions for the community's health and wellbeing.

MONITOR AND EVALUATE PROGRESS

Collect data before and after taking action to evaluate how well the plan is working and keep the school community informed about the progress and results.
